

# SCOTTISH LARDER

To guide you to better food choices for our planet, we have teamed up with Klimato to present climate labels on all retail menus during COP26. Klimato uses climate data from lifecycle assessments to calculate the carbon footprint of meals served during the Summit. The Klimato climate label indicates whether a dish has a Low, Medium or High carbon footprint

## HAGGIS, NEEPS & TATTIES

Grant's of Speyside haggis, Scottish turnip and Benzie's potatoes with an Arran mustard sauce

## VEGETARIAN HAGGIS, NEEPS & TATTIES

with marinated cabbage  
- PLANT-BASED

**BRAISED SCOTTISH VENISON CASSEROLE**  
with winter vegetables, Scottish mushrooms,  
Benzie's potatoes and herb dumplings  
(contains red-meat)

Today, an average meal has a carbon footprint of 1.7 kg CO<sub>2</sub>e in the UK. According to the WWF, we need to get this number down below 0.5 kg CO<sub>2</sub>e to reach the goals defined in the Paris Agreement. By including climate labels on our menus, we aim to make it easier to achieve this goal - together.
